*With hundreds of companies promoting their products it can be a tough call to get the visitors to spot your stand amidst all the activity. Bongard & Lind settled on these two eye-catching fellows. You couldn't miss the painted duo performing their robotic manoeuvres. **Stand 1.312A** www.bongard-lind.de*

LIER's impact test solution

French test laboratory LIER is now developing novel solutions for analysing the results of crash testing. The organisation can provide fully-instrumented crash test

dummies for use in impact tests. In addition, the organisation is also developing a new testing procedure that will become part of a new European standard for motorcyclist

protection. This will offer a comprehensive solution for system testing.
